Dear Member

Outcome Measures for Adult and Paediatric Services: 2nd Edition

I am pleased to present the second edition of the BBA publication 'Outcome Measures for Adult and Paediatric Services'. This is the product of over 18 months work by the BBA Outcomes Sub-committee and builds on the first edition published in 2012.

As with the first edition, it aims to provide a rational but aspirational set of burn care outcome measures which seek the very best for patients, rather than simply what might be achievable within current constraints. As you will see however, a number of structural changes have been made which reduce and simplify the document and bring it into line with similar documents published elsewhere in the world.

Some of the measures listed match those in the Burn Care Clinical Reference Group (CRG) quality dashboard, while most do not. This reflects the different focus and purposes of these two entities. As with the first edition, we hope that members find this document a useful tool when considering their own performance and that of other services.

Kind regards.

Yours sincerely,

Peter Drew
Chairman, BBA Outcomes Sub-committee
