

Study Day for Health Care Professionals

London, Thursday 30 March 2017

Training for Health Care Professionals

Gain an understanding of the psychological and social effects of disfigurement and the impact on patients. Participants will:

- Discover the myths and misconceptions around disfigurement and their impact on patients and their families
- Recognise factors that might predict 'adjustment'
- Discuss perceptions of 'severity'
- Identify interventions and approaches to support patients and their families
- Learn how Changing Faces can help you, your patients and their families

During the second part of the course, participants will have the opportunity to:

- Understand the importance of assessing a patient's information needs
- Develop processes to discuss coping strategies
- Practise specific techniques that patients and their families can be supported to adopt in managing social interactions
- Plan for integrating new techniques into work with patients

Cost for study day, resources and refreshments:

- 1) £95 (early booking rate)* (1 month in advance of the course)
- 2) £125 (standard rate)
- 3) £65 (for NFP/charitable organisations or students with valid student card)
