

# Emergency Management of Severe Burns (EMSB) Course

## COVID REGULATIONS

The regulations for Covid have now been confirmed and these are as follows:

*You are encouraged to have been double vaccinated prior to attending the course although this is not mandated.*

*At registration on the morning of the course, you will be asked to sign that you believe that you do not pose an infection control risk. This includes covid and other infection such as flu.*

*To be assured that this is the case, please carry out a lateral flow test (LFT) or other approved Covid Antigen test in the 24 hours prior to the course and BEFORE arriving at the venue.*

*You must NOT attend the course if the test is positive or if you have any symptoms. In this instance, please contact the local Course Organiser on the telephone number for late arriving candidates included in the cover letter of the manual pack. Please also email the BBA Manager to let her know that you will not be attending the course. Your place will be deferred in this circumstance.*

*If you have had Covid in the 90 days prior to the course date, you are likely to receive a positive LFT result. However, you may attend the course if you have completed your isolation and are symptom free.*

*If you are in any doubt regarding your attendance, please contact the local Course Organiser.*
